Eragon traveled Middle-Earth?

Author's note: I do not own any of the characters that are in this story, they belong to Christopher Paolini and J.R.R Tolkien. I now know from that Christopher Paolini has already planned out his 5th book, but this is just my attempt to write my own version of the events that happened after Eragon Kingslayer (I prefer Shadeslayer) left Alageasia.

><p>When we last saw Eragon, he was traveling down the Jiet River out into the wild unknown of the world beyond Alagaeasia. Eragon, Saphira, and Gladre (excuse my misspelling) discovered that the world was round, and that Alageasia was only a small part of the world. This tale happens in a land far away, In a world both familiar and foreign to the reader.<p>

Remember how the elves and the Urgals mentioned that they came to Alageasia from across the sea in the west? From where did they come from? This story will attempt to answer that question.
